### Description:

#### Masterclass 1: Trading International Crude Oil

This intensive and highly interactive two-day course is designed to give delegates a better understand of crude oil trading in a safe environment. Delegates gain exposure, knowledge and understanding of the workings of the world of crude oil trading and is designed for oil & gas traders. The course is a combination of lecture, syndicate work, case studies and a trading game.

#### Masterclass 2: Price Risk Management and Hedging

Due to the highly volatile nature of the price of oil, international trading introduces the risk of large unexpected losses. Price risk management is designed to reduce the price risks associated with trading and introduce an element of certainty. This interactive three-day course is designed to guide delegates through the concept of hedging, allowing them to identify price risk and learn how to manage that risk through different financial instruments.

This program is intended for :
